

Abstract

Rising from the Ground: the Formation of the Alentejo's Working Class (1926-1974) João Valente Aguiar

If a social class is far from being restricted to a structure, its historical insertion can be captured by researchers by examining its formation. Hence, in this article we aim to question the relevance of the concept of working-class formation in the mobilization of Alentejo's rural proletariat during the dictatorial regime of the Portuguese Estado Novo.

Keywords: Working Class Formation, Social Classes. Historical Process.
